ABOUT ME

Hello! I'm a passionate Full Stack Software Engineer. I am currently studying Software Engineering at the Java Institute for Advanced Technology and reading for my top-up degree from Birmingham City University. I specialize in building diverse digital solutions, including scalable websites, standalone applications, and intuitive mobile apps. My focus is always on writing clean code and delivering exceptional user experiences.

EDUCATION

BIRMINGHAM CITY UNIVERSITY

BSc (Hons) in Software Engineering (UK Top-Up)

Present

JAVA INSTITUTE FOR ADVANCED TECHNOLOGY

Software Engineering Studies

Present - 2023

RAHULA COLLEGE, MATARA

G.C.E. Advanced Level (Technology Stream)

2019 - 2021

TECHNICAL SKILLS

FRONTEND & MOBILE

• React Native • HTML/CSS/JS • React.js • Flutter • Tailwind CSS • Bootstrap

BACKEND CORE

• Java • Spring Boot • PHP

DATABASES & ORM

• MySQL • Hibernate • Firebase • SQLite

DEVELOPMENT TOOLS

• VS Code • Android Studio • IntelliJ IDEA • Netbeans • Git & GitHub • Postman
• Arduino IDE

PROJECTS

LEAFY LANE M-COMMERCE PLATFORM

- Developed a full-stack M-Commerce platform for an organic food store, featuring a Java-based Android mobile application and a Spring Boot admin dashboard.
- Implemented real-time data syncing, map integration, and centralized inventory management using Firebase, Firestore, HTML, and CSS.
- Technologies: Java, Android Studio, Spring Boot, Firebase, Firestore, Google Maps, Payhere.

LEAFY LANE E-COMMERCE WEB PLATFORM

- Developed a comprehensive organic food e-commerce web platform using Java EE, featuring an intuitive user interface and a secure database managed with Hibernate and MySQL.
- Integrated the PayHere payment gateway for seamless online transactions and implemented automated email notifications to enhance customer communication.
- Technologies: Java EE, Hibernate, MySQL, PayHere.

ZAP CHAT APP

- Developed a cross-platform, real-time chat application offering instant messaging capabilities using React Native, styled with Tailwind CSS for a responsive user interface.
- Implemented a robust Java-based backend integrated with MySQL, and powered the real-time communication seamlessly using WebSockets.
- Technologies: React Native, Tailwind CSS, Java, WebSockets, MySQL.

MEDICLINIC HEALTHCARE PLATFORM

- Architected a comprehensive healthcare solution comprising a React-based Patient Portal for medical tracking and a role-based Staff Management dashboard to streamline clinical workflows.
- Engineered a robust Enterprise Backend Engine with a secure RESTful API, implementing JWT authentication, relational database mapping, and live appointment queues.
- Technologies: React.js, Tailwind CSS, Vite, Axios, RESTful API, JWT.

WEBHOOK SANDBOX - LOCAL TESTING ENVIRONMENT

- Engineered a standalone developer tool to simulate and test webhook payloads and payment callbacks seamlessly on localhost.
- Eliminated the requirement for external tunneling tools by developing a single lightweight executable.
- Built a modern glassmorphism UI with persistent request history and dynamic status toggling using React, TypeScript, and Vite, while powering the core application with Go.
- Technologies: Go, React, TypeScript, Vite.

CBC BANKING SYSTEM (GROUP PROJECT)

- Co-developed a robust standalone desktop application to streamline and manage comprehensive internal banking operations and workflows for staff members.
- Implemented secure daily transaction handling using Java Swing and MySQL, and integrated JasperReports to generate detailed financial and operational reports.
- Technologies: Java Swing, MySQL, JasperReports.

PERSONAL DEVELOPER PORTFOLIO & AI ASSISTANT

- Developed a modern, responsive personal portfolio using React.js and Tailwind CSS, featuring a custom real-time AI assistant powered by the OpenRouter API to handle visitor queries.
- Implemented advanced UI animations with Framer Motion and integrated secure, serverless email submissions utilizing the Web3Forms API.
- Technologies: React.js, Tailwind CSS, Framer Motion, Vite, OpenRouter API, Web3Forms API.

GITHUB CONTRIBUTIONS & ACHIEVEMENTS

- **Consistent Open-Source Activity:** Maintained a highly active GitHub profile with over 700 total contributions, including 200+ commits across 22 distinct repositories within the last year.
- **High-Volume Code Integration:** Successfully opened and merged over 65 pull requests, earning the top-tier Pull Shark (x3) recognition for extensive and continuous repository contributions.
- **Collaborative Engineering:** Recognized with the Pair Extraordinaire badge for frequently co-authoring commits and seamlessly collaborating with other developers on joint projects.
